---

An interior and architectural designer / developer, a scuba diving instructor, an aspiring writer / director and something of a thinker...

Born and raised in Ukraine, having received fundamental education in math and economics, that I'm so grateful to my parents for, I then had years of experience in scriptwriting, marketing, advertising and business management, before founding my design and development firm and later moving to the States to expand my company and study filmmaking.

An award winning in anything I do\*, yet restless perfectionist, a true Gemini, these are the main principles I live up to:

*Never begin a fight if you don't intend to win it.*

*I allow myself to be deceived,  
so as not to be on my guard against deceivers.*

*It is the greatest of all mistakes to do nothing,  
because you can only do little.*

*Think different.*

Defining my life goal as "to achieve something subjectively significant", I want to help this World become a better place as much as I can; through various things, including storytelling, filmmaking, public speaking and designing a better model of our civilization... Especially because I believe I can...

\* Achievements: a summa cum laude graduate and a holder of the Ukrainian Parliament's scholarship for excellence in study, a finalist and winner of a number of TV festivals (as an editor-in-chief), a finalist and winner of a number of advertising festivals (as a partner), a finalist and winner of a number of film festivals (as a writer and director), a founder and CEO of one of the most reputable interior design companies in NYC and Los Angeles...
