Meet & Greet with a Kiss

## MIRANDA, THE KISS WHISPERER

Recently retired Navy Veteran and empathically intuitive Miranda proudly presents a unique lip print reading service for women and the fellas too throughout the USA, Internationally, and Online-Everywhere. The kiss, a human act which defies time, space, culture, and even recorded history itself, channels those unique properties in a manner not unlike the leaving of fingerprints, though far more intimate and poetic in nature.

Miranda, the KISS Whisperer will identify and further explore that very poetry. However, like the words of all skilled poets, their deeper meanings might be very much present but somewhat elusive. Identifying such meaning is itself an art form...the very art Miranda has devoted her life.

## WHY LIPSTICK?

Lipstick, the most essential of makeup products creates for its wearer much more than a colorful smile. As much as it provides in terms of surface-level beauty, properly selected lipstick also highlights certain unique properties inherent in all lips. This creates the potential for something far more elemental in nature.

You've probably heard of fortune tellers, palm and tarot card readers, but what if the key to understanding those secrets was as simple as a Kiss?

A Kiss Whisperer specializes and will reveal the secrets found in lipstick readings. Your lips are as unique as your fingerprints. Believe it or not, your kiss may tell your journey and hold your destiny. With two kisses, you will receive hidden truths about your past and present. But that isn't much fun without knowing about the future. We have the key to unlock your future as well. It's all in a kiss.
