PASSION (Cinema and music)

When I was about 15 years old, I started watching movies and it generated in me a passion for cinema. I watch all the movies whatever the country, the era, or the theme, in the original language with English subtitles.

The directors I admire the most are Terrence Malick (Knight of cups), Andrei Tarkovski (Sacrifice), Stanley Kubrick (A Clockwork Orange) or Wong Kar-Wai (Chungking Express)

This passion for cinema gave me the desire to write scripts, to direct and edit videos (podcasts, experimental work, documentaries). Therefore, I made in 2023 two movies called "XI Steps of Existence" (experimental) and "30 Years of Ice" (fiction)

Moreover, I do some music. My artist name is Leirbag X.O. I mainly post on Instagram and YouTube.
